---

**MIRO BOKARIC - BV ELECTRIC | (415) 666 - 9990 | [bvelectric@gmail.com](mailto:bvelectric@gmail.com)**

WORK AREA: San Francisco / North Peninsula / East Bay

WEBSITE: <http://www.bvelectricinc.com/about/>

BIO: BV Electric is a family-owned business based in San Francisco and managed by a licensed electrician with more than 20 years experience in the industry. We offer a wide range of services from rewiring new electrical service panels, upgrading existing service, lighting, intercom systems, door entry systems, troubleshooting, repair, and more. We provide exceptional electrical services and solutions for residential and commercial clients. BV Electric is committed to safety, quality, and reliability. We adhere to safety standards and meet all city regulations.

**GAVIN CHEN | (415) 810 - 3620 | [gavincue@gmail.com](mailto:gavincue@gmail.com)**

WORK AREA: San Francisco

BIO: Electrician magician is what my coworkers called me at Cole Hardware. I was an in-house electrician at Cole Hardware and now I'm an electrical handyman. I have more than 15 years of skilled electrical installation and repair experience. I also have expertise in fixing and rewiring antique chandeliers, modern lamps, door strikes, and door bells. Customers often call me MR. FIX IT! For your convenience I am also available to work after 6 p.m. most days and weekends. I am punctual, honest, reliable, and work safely.

**ANDREW VOIGT | (415) 793 - 0213 | [andrewcharlesvoigt@gmail.com](mailto:andrewcharlesvoigt@gmail.com)**

WORK AREA: San Francisco / East Bay

BIO: A master electrician, Andrew earned his title through the old school tradition of apprenticeship. In 1985, he began pursuing his fascination with all things electrical by signing on with master electrician Jon. Under his tutelage, Andrew learned theatrical lighting, residential and commercial electrical, and the special ins and outs of knob and tube wiring in San Francisco's famous Victorians. To this day, Andrew lives and breathes knob and tube, claiming "if the system hasn't been 'remuddled,' it has a proven track record of being a very safe wiring method."
